We, the tennis playing community of Lawrence Kansas, would like to express our concern over the design of the new tennis facility at Lawrence High School. For many years the LHS courts have doubled as Lawrence's only community tennis center. Our community tennis center has hosted numerous night USTA and WTT leagues and tournaments. It is widely used by tennis players from all over town because it was the only large facility with lights available to the general public. People from all parts of town come together there to meet new tennis players. Any modern community tennis center needs lights. The lights at the Lawrence Tennis Center were used 7 nights a week from early spring to late fall. The courts are often full of players after dark. It would be a great loss to our community to be without lights and we strongly urge the City and the School District to install lights at the new complex. (2/28/2009)
