CITY MANAGERS OFFICE
LAWRENCE, KS

Dear Diane,

We had the techs put a unit up for 5 min and shoot some photos to show what it would look like. Attached are pictures of the proposed installation at 10th and Mass.

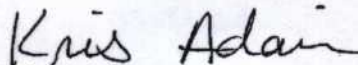

The only difference between this and our other sites around the city is that the technicians will cut the power cable to length. At our other sites we have simply coiled these cables and hung them under the equipment.

You can see existing installations up and down pretty much any other street in town. You can probably see one from the windows at city hall - it is located at 6th and Kentucky.

The installation process itself is simply. We strap up the radio, plug it in and secure the power cable.

Please let me know if you need any additional information.

Sincerely,

Kris Adair
Treasurer
