CC: Mark Thiel, Assistant Public Works Director

Date: January 29, 2013

RE: Item for City Manager's Report for February 5, 2013
PW 1113 Sidewalk Gap Program

Project Summary

Construction for project PW1113 CDBG Sidewalk Gap has been completed. This project was funded with Community Development Block Grant (CDBG) funds allocated for 2011 and 2012, for sidewalk improvements in low to moderate income areas. The total cost of the project was \$142,000 and 2,725 linear feet of new sidewalk has been constructed. Gaps were filled in several areas around the city. The city has received compliments from residents in Babcock Place about the sidewalk recently installed on New Hampshire from 17th to 19th Street. New sidewalk has been constructed on the east side of Iowa Street from Harvard Road to 6th Street to fill in areas that previously had no sidewalk. This allows pedestrians to travel south from the intersection of 6th Street & Iowa Street where they previously could not. New sidewalk has also been installed in heavily traveled pedestrian areas including east of 9th and Iowa and the south side of 11th Street from Indiana to Mississippi in response to public requests.
