As a quick update for you and the commissioners, we have received some preliminary conceptual drawings and cost estimates from the architect. We now need to refine and determine a final direction as well as phasing. In the short term, we are still proceeding with making structures weather proof and secure. This time of year some work will of course be somewhat temporary. Give me a call if you need some additional details at this time. This message is through my phone and somewhat truncated. You are of course more than welcome to share this information with the commissioners.

Brian,

In August, the city commission granted you 90 more days to come up with a plan to be presented. We are at that time limit and the item needs to come back to them for discussion. Can you tell me what has happened of late? I will be scheduling for the agenda in early December.
