### **NOTE ON CHANGE IN METHODOLOGY:**

To calculate the Total City Levy and Total Mills Levied in City by All Units, the League in the past has averaged the mill levy rates of all taxing units within each city. However, because some of the taxing units being used to calculate that average were a small fraction of a city's total assessed valuation, those units would sometimes distort the final average. For that reason, this year the League implemented a weighted average for Total City Levy and Total Mills Levied in City by All Units, which takes into account the total assessed valuation of each taxing unit. This new methodology will result in slight changes in the Total City Levy and Total Mills Levied in City by All Units for a handful of cities of the first and second class.
