

Product Reuse Program

The purpose of the Product Reuse Program is to use up products as intended in order to promote the reduction of household hazardous waste entering our sanitary landfill and to reduce the disposal fees of hazardous waste.

Come “Shop” Our Shelves And Save

Many products are collected through the City of Lawrence/ Douglas County Household Hazardous Waste Program that are in good, usable condition. These products are put on our Product Reuse shelves. These items are available to the public FREE of charge. Call **832-3030** to schedule an appointment to come “shop” at our Product Reuse Facility.

(Don't know what to do with the items listed above? Call 832-3030 for disposal options.)

What is Hazardous Waste?

Hazardous Products in Households

Homes are full of hazardous waste. Look for the words **Danger, Poison, Warning** or **Caution** on the product label. "Danger" and "Poison" signal the most hazardous products. "Warning" and "Caution" indicate less hazardous products.

A product is classified as hazardous if it has one of the following characteristics:

IGNITABLE. Flammable. Combustible. Paint, thinners, other solvents and automotive products are the most flammable home products. Look for words on the product label like: "Do not use near heat or flame."

CORROSIVE. Eats through materials. Oven cleaners, drain cleaners, toilet bowl cleaners and auto batteries are common corrosive products. Look for words on the product label like: "Causes severe burns on contact." "Can burn eyes, skin, and throat."

TOXIC. Poisonous or causes long-term illness, such as cancer. Pesticides, solvents and some cleaners are toxic. Look for words on the product label like: "Harmful or fatal if swallowed." "Use only in a well-ventilated area."

REACTIVE. Can explode when exposed to heat, air, water or shock. There are few consumer products still on the market that are explosive. Fireworks are a common reactive material.
